

## Evaluation of Perinatal HIV Prevention Programs Workshop

---

**Goal:** To familiarize grantees with various data sources for assessing changes in testing rates among pregnant women and changes in treatment and transmission rates among HIV-positive pregnant women. To understand the strengths and weaknesses of each data source.

**Objectives:**

1. To provide an overview of data sources available for assessing changes in HIV testing rates among pregnant women.
2. To discuss three specific data sources for assessing changes in HIV testing rates among pregnant women.
3. To discuss enhanced perinatal surveillance data as a source for assessing changes in appropriate HIV preventive treatment and HIV transmission among HIV-positive pregnant women.

**Moderators:** Stephanie Sansom  
Abu Abdul-Quader

**Speakers:**

Chart reviews: Barbara Sullivan, California  
PRAMS: Dana Giurgiutiu, South Carolina  
C&T data: Amy Zapata, Louisiana  
Enhanced perinatal surveillance: Debbie Wendell, Louisiana

**Discussion points:**

1. How the data is being obtained and used to measure the outcome.
2. Use of pre- and post-test surveys to assess changes in testing rates.
3. Barriers that have been encountered, and solutions, in using data sources.
4. Data source's strengths and weaknesses regarding its ability to measure the outcome.
